Claims 1-15 YES

Claims NONE NO

Inventive step (IS)

Claims 1-15 YES

Claims NONE NO

Industrial applicability (IA)

Claims 1-15 YES

Claims NONE NO

2. Citations and explanations:

Claims 1-15 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the method of the claimed invention.

The invention of the instant claim is drawn to a method comprising transfecting a packaging cell with a retroviral expression vector, culturing the transfected packaging cell line, culturing mammalian natural killer cells in the medium with the packaging cell line. The packaging cell line is a phoenix cell line, the expression vector is PINCO, the natural killer cells include CD56^{high} and CD56^{dim}.

Liberatore et al. teach a method of transfecting natural killer cells. The Liberatore et al. method use phoenix and PA317 packaging cell lines. Liberatore et al., however, fail to teach that the natural killer cells are grown in the same medium with the packaging cell line.

Notal et al. and Cheng et al. generally teach phoenix packaging cell lines, not a method of transfecting natural killer cells.

Claims 1-15 the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
